DEFI-B BATTERY AND DEFI-N MAINS OPERATED DEFIBRILLATORS

33380

In emergency situation the well structured and logical operator guidance may save a life

Suitable for adult and children (reference norms ERC 2005 use of joule depending on kg).

Compact and handy: PRIMEDIC DEFIB is easily transportable and immediately ready to use everywhere

- 33380 DEFIB-B DEFIBRILLATOR - 220V
- 33382 DEFIB-B DEFIBRILLATOR - 110V
- 33383 DEFIB-N DEFIBRILLATOR - 220V

The mobile security: PRIMEDIC DEFIB and DEFIB-N are a state-of-the-art accumulator-driven defibrillators. They were designed in accordance with strict requirements of emergency medical science. Fully developed and reliable technique, worldwide in use for years. PRIMEDIC DEFIB is a mains-independent

version and has proved successful in daily use in ambulances, with cardio sport groups and in hospitals. DEFIB-N is a mains operated version. The convincing advantages: PRIMEDIC DEFIB-B and DEFIB-N are quickly ready to use, DEFIB-B not mains dependent due to large accumulator capacity. After switching on the defibrillators, an internal self-test with error diagnosis is carried out automatically. Pictograms and a clear program run, to ensure functional handling. A shock-resistant plastic casing protects the device, especially in hard conditions.
